

MODERN KITCHENS

How to Plan

EFFICIENT KITCHENS

MORGAN *Sectional* KITCHEN CABINETS

MORGAN SECTIONAL CABINETS MAKE MODERN, EFFICIENT AND BEAUTIFUL KITCHENS

Your kitchen should be just as attractive and livable as any room in your home. It should be a cheery and efficiently equipped place designed to encourage your creative inclination in the preparation of appetizing meals.

An old fashioned, poorly arranged kitchen with cluttered, cumbersome, dirt catching equipment is a menace to health and beauty. It puts dispositions on edge—and mars happy family life.

Morgan Modern Kitchen Cabinets will quickly and inexpensively convert an old fashioned kitchen into a room of beauty and convenience—a place that is really a pleasure to work in—where utensils are just where they should be—always within easy reach and never in the way. The space arrangements in all Morgan Cabinets were suggested by domestic science authorities and consequently assure minimum waste of motion and time.

The Morgan Cabinets shown on the preceding pages are

beautifully designed, practical and convenient. Such a wide variety of sizes and styles is available that you can easily get an individual Morgan Cabinet or an assembly of cabinet units exactly suited to your individual needs, however simple or elaborate they may be.

Ultra modern indeed in every detail of convenience—these superior cabinets possess the beauty and perfection of accepted and correct design for which all Morgan products are famous. With Morgan Cabinets in your kitchen you can be proud of unerring taste in their selection and your pride in them will endure, for Morgan Cabinets endure. Built of fine wood—fitted carefully together by painstaking craftsmen these cabinets are made to give years of friendly service. Notice how snugly and flush the doors and drawers fit—no dust or vermin can find entry—notice, too, the excellence of the hardware—Chromium plated—dirt deflecting—rust proof! Examine all the workmanship—then we feel sure you will install Morgan Cabinets in your kitchen!

For greater efficiency in your Kitchen

Use MORGAN SECTIONAL KITCHEN CABINETS

A MERICAN women demand a modern home kitchen of good design and efficient in every respect! The advantages of such a kitchen are obvious.

As the foundation of a modern kitchen, we offer Morgan Kitchen Cabinets which are styled to assemble effectively into a "stream-lined" kitchen.

Such a kitchen releases the fortunate home-maker from drudgery, makes cleaning easier, with definite savings in time and steps. Women get better results with less effort in this modernly arranged kitchen in contrast with the daily struggle in the old-fashioned, inefficient kitchen with out-moded equipment.

These new kitchens are the result of intensive research by home-makers, home economists, and engineers searching for the best practical labor-saving arrangement plus new and better equipment to best realize these advantages. It has been generally agreed that a kitchen should be organized into "work centers". Three major centers have been fairly well standardized, a fourth is sometimes desirable.

1. Storage and Preparation Center

Here should be grouped food storage, including the refrigerator for perishable foods, shelves for canned and packaged goods, special drawers for flour and sugar, and a working surface for food preparation with utensils, mixing-bowls, electric mixer, and baking pans close at hand.

2. Cooking and Serving Center

Here will be found the range and an adjacent working surface, with wall cabinets for the storage of serving dishes and glassware; also base cabinets for utensils used at the range.

3. Cleaning and Dishwashing Center

Here the center is dominated by the sink. An electric dishwasher may be permanently installed either adjacent to it or as an integral part of the sink base. The base cabinet provides for

cleaning materials, garbage container, and a drawer for dish towels.

Supplementary or optional centers usually found in the more complete kitchens include:

4. Utility Storage Center

This is comprised of at least a tall storage cabinet to store aprons, a broom, vacuum cleaner, wax polisher, together with shelves for linens, additional appliances and cleaning materials.

5. Planning Center

A desk at convenient height with a comfortable chair, extension telephone and a shelf or drawers for cook-books, grocery lists, and odds and ends, is an important time-saver for the busy home-maker.

On page 4 are shown elevation drawings of these simplified "work centers", with the catalog numbers of Morgan Cabinets indicated.

WORKING CENTER SUGGESTIONS

Storage and Preparation Center

Here is the starting point for kitchen operations. Incoming supplies are deposited on the working surface. The refrigerator should be placed so the door opens away from the working surface. Here foods and working tools should be ready for use together as required. Storage space will be required for such things as flour, sugar, mixing utensils, bowls, graters, baking pans, and condiments. The most desirable arrangement for this center is to have a continuous counter top with the refrigerator at one end and the sink at the other, as so much of the work of preparation, peeling vegetables, etc., naturally requires the use of the sink.

The principle to be observed in storing equipment is to place it at the point where it is first used, i.e., frying pans, griddles, tea kettles, etc., should be stored near the range, while baking pans, salad-making equipment, etc., should be stored at the preparation center.

The upper shelves in the wall cabinets should be used for packaged goods, canned fruit, etc.

Cooking and Serving Center

A working surface not less than 24 inches wide is desirable at this center, which, with the table top on the range, should provide sufficient area for an average home.

MORGAN *Sectional* KITCHEN CABINETS

With an Electric Range, wall cabinets may be safely installed 18 inches above the range as there is no hazard from flames or excessive heat. If gas range is used cabinet should be installed 26 inches above the range and be properly insulated at the bottom. The wall cabinet will accommodate serving dishes, tableware, trays and glassware, while the base cabinets, in addition to those usually furnished in the range, have space for cooking utensils, cooking tools, bread and cake storage, cutting-board, crackers and breakfast cereals. Glass doors on the wall cabinets at this center may be used.

This center must be located close to the dining-room door for maximum convenience.

The working surface at this center should be of a material which will give long life; monel, stainless steel, porcelain or Birch are particularly satisfactory.

Cleaning and Dishwashing Center

The most desirable location for the sink is below a window.

The size of the sink bowl should be large enough to wash conveniently the largest cooking utensil used. Where space permits, sinks should be equipped with double drainboard. It is desirable that the back-splasher be low to permit the sink to be placed under a window—3½ inches is ample.

A Morgan towel drying rack under the sink and behind the M-5044A Grille is a useful and very desirable accessory. A drawer near this point for dish towels is convenient.

A radiator to heat the kitchen may be located below the window at the rear of the sink with a grille opening such as M-5044A to provide maximum radiation.

Utility Storage Center

Where space is available, a well planned kitchen will include a tall storage cabinet such as M-5059 or M-5061 to store the broom, aprons, vacuum cleaner, wax polisher mop, extra cleaning materials, with the upper portion reserved for extra storage of canned and packaged goods, as well as flat storage of towels and linens.

Much of the equipment stored in the old-fashioned pantry may be stored at this center. The location of this center in the kitchen may be readily varied to suit the floor plan. Do not break up what otherwise might be a continuous working surface. A space adjacent to the refrigerator or planning desk will usually be found most convenient.

Planning Center

At this center a planning desk such as M-5063 with a comfortable chair are the essentials.

If the kitchen includes two windows, it is usually most desirable to locate the planning desk near one of them.

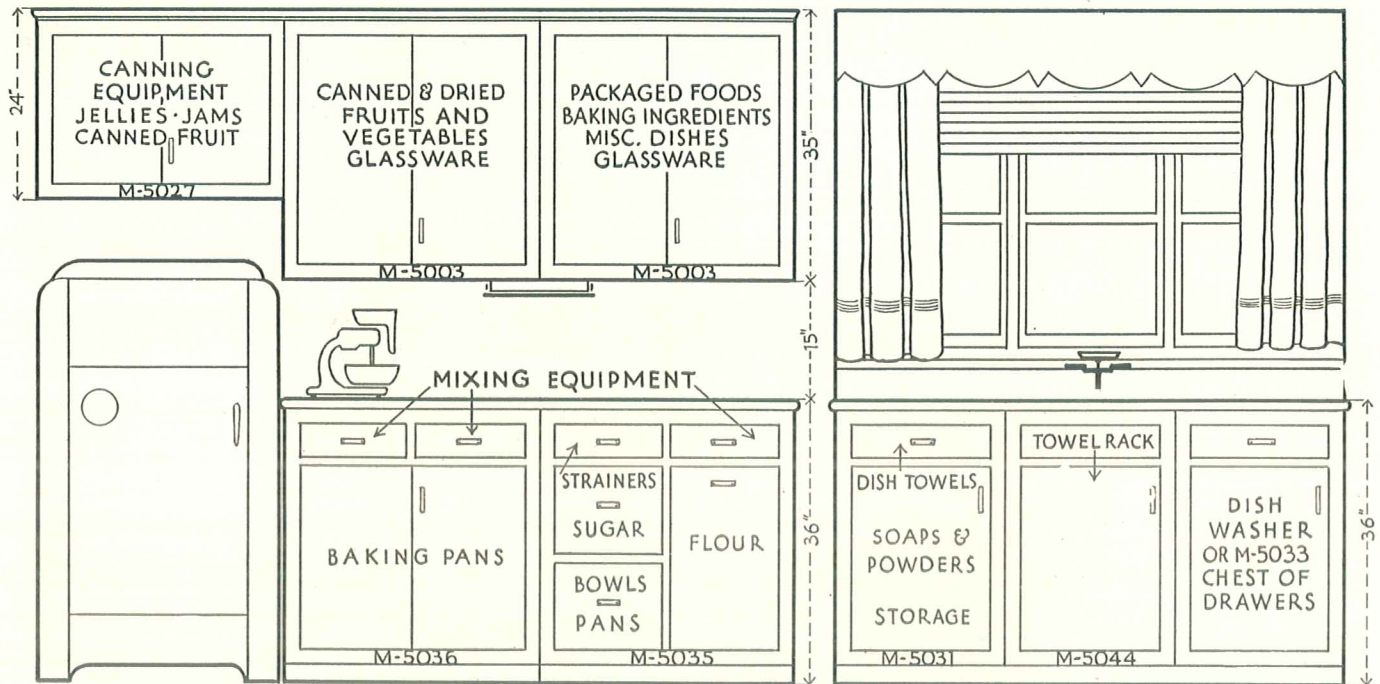

An extension telephone in the kitchen at this point is a great convenience. Convenient outlets should be provided for a radio and desk lamp.

On the following pages are shown several fine examples of carefully planned kitchens in which Morgan Sectional Cabinets were installed.

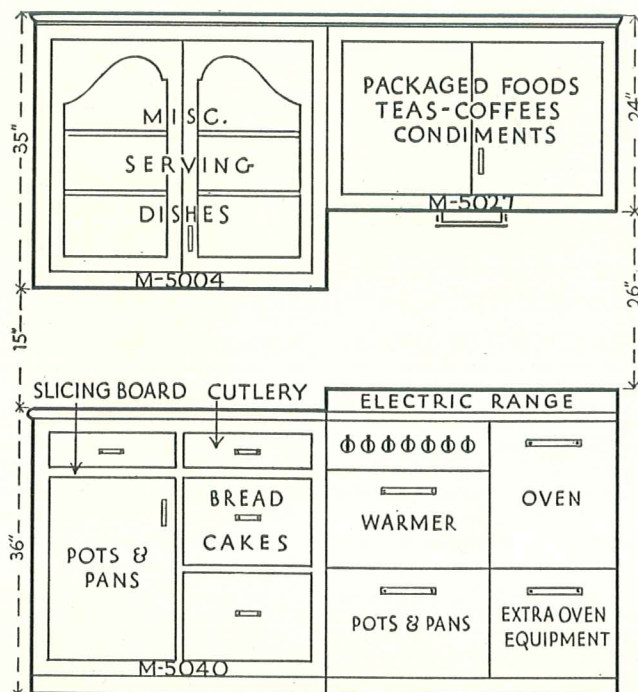

MORGAN Sectional KITCHEN CABINETS

TYPICAL MORGAN WORK CENTERS

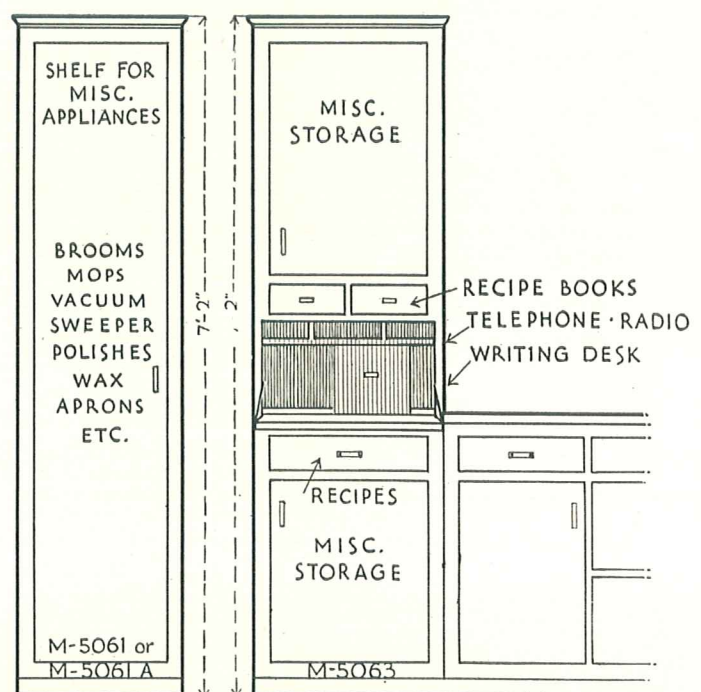

1-Storage and Preparation Center

3-Cleaning & Dish-Washing Center

2-Cooking and Serving Center

4-Utility Storage Center

5-Planning Center

The modern Kitchen is attractively designed and planned scientifically to facilitate the preparation of meals, provide ample storage space and reduce the

toil of cleaning and dishwashing to a minimum. Morgan Kitchen Cabinet Units are up-to-the-minute in style, efficiency and construction.

MORGAN *Sectional* KITCHEN CABINETS

CONVENIENCE PLANNED FOR

The convenient kitchen arrangements shown on this and the succeeding pages are but a few of the hundreds of modern labor-saving — step-saving layouts made possible by the use of the Morgan Kitchen Cabinet units shown on the following pages.

The plan shown to the right is ideal for an average home. It provides, as all kitchens should, a natural route for the preparation of meals from the refrigerator to the sink and work counter to the stove and finally to the dining room table.

STEP SAVING

Picture your own kitchen equipped with a Morgan Modern Cabinet assembly. Imagine all the unnecessary effort, confusion, and the countless steps it will save you. How easily it can be kept clean — how orderly and convenient it will be with a place for everything and everything in its place. Most important, too, how much brighter and more pleasant your kitchen will look — why you cannot but absorb and reflect the same brightness and cheer!

Morgan Kitchen Cabinets are not thoughtlessly planned make-shifts. The assembly suggestions in this book were carefully planned with the assistance of a number of nationally famous domestic science authorities, architects and others specializing in kitchen problems who know just how and where to place each door, shelf, drawer and tray for your utmost convenience.

MORGAN *Sectional* KITCHEN CABINETS

APPROVED!

Morgan Kitchen Cabinets are approved by the leading architects and kitchen planning authorities of the United States because they are correctly designed to produce attractive, modern, efficient kitchens. Morgan Kitchen Cabinets are in good taste, well balanced and though they are modern in every sense, harmonize very nicely with Morgan Period Woodwork.

FIT ANY SPACE

Regardless of the size or layout of the kitchen, irregular, square, or rectangular, the great variety of Morgan Kitchen Cabinet units shown on this and the following pages, will produce an arrangement just suited to any space and family requirements.

While all units are built so that they can be assembled into large groupings, many units are self sufficient pieces of furniture that may be used separately in bedrooms, halls, closets and elsewhere in the home.

ACCESSIBILITY THE KEYNOTE HERE

Another scientifically planned kitchen showing the remarkable adaptability of Morgan Kitchen Cabinet units to any need. Everything handy. Few steps needed here to prepare meals.

SCIENTIFICALLY DESIGNED

Just as efficiency in an office is obtained with modern time and labor saving devices — so does efficiency in the kitchen—the real office of the home—demand the scientifically designed Morgan Modern Cabinet. Don't hamper your own development because of old fashioned equipment. Preserve your youthfulness and pleasant disposition with a Morgan Modern Kitchen Cabinet.

MORGAN Sectional KITCHEN CABINETS

SUPERIOR QUALITY—STANDARD MORGAN CONSTRUCTION and WORKMANSHIP—

UP-TO-DATE, EFFICIENTLY PLANNED AND BEAUTIFULLY DESIGNED FOR THE MODERN KITCHEN

A FEW OF THE OUTSTANDING FEATURES OF MORGAN SECTIONAL KITCHEN CABINETS

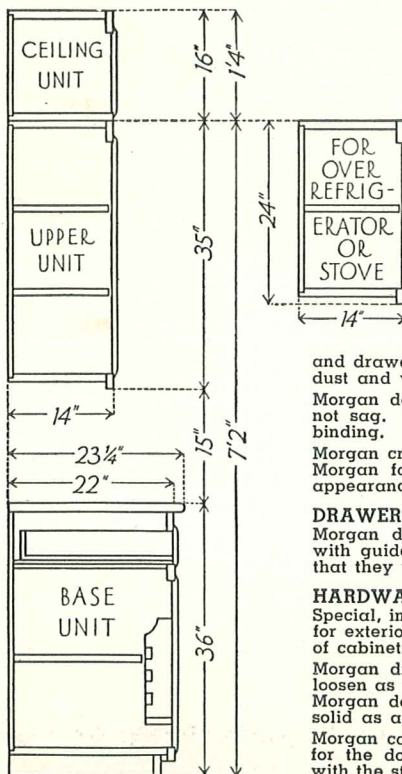

As Illustrated to Left

DESIGNED TO MEET ALL THE REQUIREMENTS OF THE MOST CAREFULLY PLANNED KITCHEN—DUST-PROOF, FLEXIBLE, SPACE-SAVING.

1. Counter Top $1\frac{1}{8}$ " thick, Nosed front edge and both ends. Furnished in Birch.
2. Chromium Plated Drawer Pulls. Secured from the back.
3. Drawer lipped all around, solid sides and back, 3 ply bottom. (1 drawer in M-5036 and M-5040 with cutlery division.)
4. Improved Drawer Corner construction.
5. Flush Doors, lipped all around, beveled inside edge.
6. Elbow Catch.
7. Heavy Back.
8. Hardwood Tray Guides.
9. 2 Solid Ends, $\frac{3}{4}$ " thick, dadoed to receive bottom and slide frame and rabbeted to receive back.
10. Chromium Plated Hinges.
11. Improved Chromium Plated Catch.
12. Lid rack.
13. Sliding Tray Shelf.
14. Bottom of cabinet heavy $\frac{3}{4}$ " thick Pine.
15. Toe Space.
16. Drawer Slide Frame, Guides and Anti-Tipping Cleats included. (Not exposed.)

POINTS OF SUPERIORITY IN MORGAN CABINETS

Measurements of Morgan Kitchen Cabinets

Planned by noted architectural and domestic science authorities. The men engaged to design Morgan Period Woodwork also designed Morgan Kitchen Cabinets.

Scientifically conceived to render greatest efficiency in kitchen layout—time-saving—tool-saving!

Fit any space—meet any requirement. Hundreds of practical assemblies may easily and quickly be produced with Morgan Kitchen Cabinet units.

Strictly modern in design—exposed surfaces are all flat, dust-proof, sanitary, easy to keep clean. Morgan Cabinets harmonize with all of the latest modern designs in ranges, refrigerators and other kitchen utilities.

DOORS

Doors are 5 ply with Basswood veneer and are guaranteed not to warp, twist or buckle. Doors and drawers have lip fronts providing added security against dust and vermin.

Morgan doors are very light and easy on hinges. They will not sag. The beveled rabbet on Morgan doors will prevent binding.

Morgan cross banding on doors makes smooth exposed edges. Morgan face veneers are Basswood giving a smooth satiny appearance and providing a perfect painting surface.

DRAWERS

Morgan drawers have $\frac{3}{4}$ " sliding frame under the drawer with guides on each side nailed into the side of the body so that they will have easy action at all times.

HARDWARE

Special, improved tarnish proof Chromium hardware furnished for exterior, and Cadmium and Nickel plated parts for interior of cabinets.

Morgan drawer pull is neat and attractive. Screws will not loosen as they are fastened through the drawer from the back. Morgan door handles are sturdier, more attractive, and more solid as attached to the door from the back.

Morgan catch for the handle is substantial and is a sure lock for the door, as the flanges have a positive square contact with the strike plate.

BODY OF CABINET

Made of No. 1 Pine ready for painting. Substantially constructed.

The face rim in Morgan Kitchen Cabinet base units is 2" on sides and bottom with a $2\frac{1}{2}$ " top rail.

Morgan front frame is mortised and tenoned and glued together, whereas the frame in many cabinets is nailed only. Top and bottom end pieces of the body of some cabinets are made of Plywood, while the ends of Morgan Cabinets are made of $\frac{3}{4}$ " solid Pine. Morgan front frame is grooved so that the end pieces that are tongued fit together perfectly.

In many cabinets $\frac{1}{4}$ " panels are used for the bottom shelf, whereas Morgan shelves are of solid Pine.

Working heights are full 36"—the most convenient height for the average housewife. Eliminates tiresome stooping.

Space arrangements in all Morgan Cabinets were worked out by domestic science authorities and consequently assure minimum waste of motion and time. Utensils are always where they should be—always within easy reach and never in the way.

Morgan Kitchen Cabinets are made so regular stock sinks and drainboards of porcelain, tile, Monel Metal, Stainless Steel, Bakelite, Formica or plain wood fit perfectly. Note: Your dealer can furnish any type of sink or counter top desired.

Furnished unpainted to enable the painter to finish cabinets to harmonize with the color scheme of the kitchen. Already painted cabinets often clash with other colors in the kitchen.

Continuous toe space at base of cabinets is provided for working comfort and to keep front of base free from mop stains. (No legs to catch dust.)

Metal bread and cake drawers and flour container of special heavy sheet tin. Metal flour bin (50 lb. capacity) is of AAA charcoal tin.

Morgan Kitchen Cabinets can be easily and quickly put together. All pieces are clearly marked so that "A" fits into "A", "B" into "B", etc. Furthermore, each carton contains full direction sheets.

MORGAN Sectional KITCHEN CABINETS

HARDWARE INCLUDED

All hardware is furnished with Morgan Kitchen Cabinets and is packed with each unit—Exterior hardware is Chromium plated—Interior, Cadmium and Nickel plated.

TOWEL DRYING ROD

Towel Drying Rod of suitable length is furnished with each sink enclosure.

SLICING BOARD—M-5069

M-5069 SLICING BOARD. Furnished as an extra. Can be used with base unit M-5031, 2-0 width, all sizes of M-5036, M-5039A, M-5041, M-5042 and M-5029. Can be installed below counter or below drawers as desired.

Slicing Board is made of Maple, 1'-6 $\frac{3}{8}$ " wide x 1'-8" long, $\frac{3}{4}$ " thick. Furnished with 2 slides 1 $\frac{1}{8}$ " x 1 $\frac{1}{8}$ ".

CUTLERY COMPARTMENT

Cutlery Compartment is furnished with M-5036 and M-5040 base units only.

HOW TO INSTALL HARDWARE ON MORGAN KITCHEN CABINETS

Apply hinges to door only; do not countersink. (Fig. 3.)

Decide height to locate catch on door. Then bore $\frac{1}{4}$ " hole for plunger C (Fig. 5), measuring 1 $\frac{1}{8}$ " from edge of door to center of hole. (Fig. 4.)

Directly in line $\frac{1}{2}$ " above and below the plunger hole (center to center) bore two more $\frac{1}{4}$ " holes for upper stud D and lower stud E. (Figs. 4 and 5.)

Apply catch handle on outside of door and catch unit on inside, with bolt toward edge of door, securing with screws furnished.

Apply strike to edge of front A (Fig. 1) for single door, or to back of left hand door of double doors. (Fig. 2.) Make final adjustment so catch works properly, tighten screws and drive in Escutcheon Pin to hold securely in place after hinges have been screwed to front. (Fig. 3.)

Adjust door B in opening in front A so that door overlaps front equally ($\frac{7}{32}$ ") on both edges. Then screw hinges to front.
